## Empowering Solopreneurs to Create Their Own Websites and to Start Brewing Up the Magic Now

Who knew that time in the trenches as a senior technical director in the Feature Film Division at George Lucas's Industrial Light & Magic with film credits for Star Wars, Jurassic Park, and more would be the foundation for Christina Hills' magic ride to enduring entrepreneurial success?

Since 2008, she has empowered thousands of solopreneurs worldwide to create their own websites in WordPress to communicate their own special magic in the world as she leads the Website Creation Workshop. This tuition based online training teaches non-techie heart-centered entrepreneurs, authors, experts, coaches, and consultants to easily create their own websites without being beholden to a webmaster. She loves to teach WordPress in a creative way to guide clients to clarity about their marketing, message, and model.

Christina is a frequent podcast guest who has also shared the stage with luminaries including Eben Pagan, Lisa Sasevich, Mike Koenigs, Susanne Evans, and Tom Antion. She teaches about a variety of topics, all with a focus on the enduring value of a WordPress website.

### Suggested Interview Questions

- How did you discover that empowering solopreneurs to create their own websites would be your magic carpet ride to creating a 6-figure business for yourself?
- What are 3 costly consequences of waiting to create your website and what approach would you suggest instead?
- What are the 5 biggest challenges solopreneurs can conquer when they take on the task of creating their own websites and why the process can be so transformational?

### Hot Topics
